Projects

WEB BASE CHATBOT FOR COLLEGE ADMISSION

- A college admission chatbot built with Python, ML, and Flask uses NLP for 98% accurate query responses.
- Flask manages the backend, while jQuery enhances the frontend for dynamic user interactions.
- The system efficiently answers common admission questions, improving user experience and reducing manual workload.

WEB BASED SPAM MESSAGE DETECTOR

- The SMS Spam Detection project uses Python to develop a model classifying SMS messages as spam or non-spam.
- It involves text preprocessing, TF-IDF feature extraction, and training with Naive Bayes or SVM.
- The model is integrated into a Flask/Django web app for real-time predictions and deployed on a cloud platform.

MAKING AI USING PYTHON

- The SMS Spam Detection project uses Python to classify messages as spam or non-spam.
- It involves text preprocessing, TF-IDF feature extraction, and training with Naive Bayes or SVM.
- Integrated into a Flask/Django web app for real-time predictions, it's deployed on a cloud platform

Education

2025	Indala college of Engineering,Kalyan,University of Mumbai	Computer Engineering	**Pursuing**
2022	Adarsh Institute of Technology and Research Centre,Vita	Diploma in Computer Science	**79.71%**
2020	Bharatmata Vidyalay And Jr. College, Mayni	HSC	**52.62%**
2018	Bharatmata Vidyalay And Jr. College, Mayni	SSC	**71.20%**

Slkills

- Python
- Java
- HTML
- CSS
- Java-Script
